PUNTUEN SEGIDA, PUNTUEN KOKAPENA
LERRU TANGENTEEN SORTAREN INGUATZAILEA

METODOA BERA :

$$Y = Y(X)$$

$$P = \frac{dY}{dX}$$

$$P = \frac{Y - \Psi}{X - 0}$$

$$\Rightarrow \Psi = Y - PX$$

$$\Psi = \Psi(P)$$

$$\left. \begin{array}{l} Y = Y(X) \\ P = P(X) \Rightarrow X = X(P) \end{array} \right\} \begin{array}{l} Y = Y(X(P)) \Rightarrow Y = Y(P) \\ \Psi = Y(P) - P X(P) \end{array}$$
